Read the basic safety procedures and complete the sentences with the correct verbs from the table below.

carry, keep (2x), tie, throw, lock, wear(2x), pull, unplug, check, use
--

USING POWER TOOLS SAFELY

If you treat power tools with respect and handle them carefully, you should never have an accident. Always follow these basic safety procedures, whatever tool you are using:

- Do not(1) loose clothing or jewellery which could get caught in the moving parts of a tool.
- (2)back loose hair.
- (3) protective eye shields whenever you are doing work which could throw up debris.
- Never(4) a power tool by its cable or use the cable to(5) the plug out of a socket.
- (6) the cable and plug regularly for wear or damage.
-(7) power tools when not in use and before making adjustments or changing accessories and attachments.
- (8) children away from areas where power tools are in use.
- (9) tools away when you have finished work.
- Do not(10) power tools in the rain or in very damp conditions.
-(11) handles and grips dry and grease-free.

- **Don't (12) used batteries from cordless tools into water or a fire, as they are likely to explode.**
